

Meloxicam Dog Dosage Calculator by Weight (mg/kg Chart + Safe Dose Guide)

This printable guide is designed for dog owners in the United States. Always consult your veterinarian before giving meloxicam.

Weight (lbs)	Weight (kg)	Initial Dose (0.2 mg/kg)	Maintenance Dose (0.1 mg/kg)
5 lbs	2.3 kg	0.46 mg	0.23 mg
10 lbs	4.5 kg	0.9 mg	0.45 mg
20 lbs	9 kg	1.8 mg	0.9 mg
40 lbs	18 kg	3.6 mg	1.8 mg
60 lbs	27 kg	5.4 mg	2.7 mg
80 lbs	36 kg	7.2 mg	3.6 mg
100 lbs	45 kg	9.0 mg	4.5 mg

Dosage by Condition (General Guidance)

- Arthritis / Joint Pain: Long-term maintenance dose (0.1 mg/kg daily)
- Post-Surgery Pain: Initial higher dose (0.2 mg/kg) then reduce
- Acute Injury: Short-term use under vet supervision

Safe Use Tips

- Always give with food
- Do not mix with other NSAIDs or steroids
- Watch for vomiting, diarrhea, or lethargy
- Stop use and contact vet if side effects appear
